

I believe that KLOVE radio is an incredibly positive influence in my local community. It not only provides national news and other informational and entertaining services, but it is a steady stream of positivity in a world that often full of discouraging influences. If the KLOVE radio station in our community was displaced by an LPFM broadcaster, this positive influence would most likely be lost. Very few radio stations in existence these days offer an encouraging and positive influence on society. They are all about economics and entertainment. Since KLOVE is listener supported, they cannot be swayed by the corporate "megastations", and are free to stay true to their simple positive roots. We need stations like KLOVE, so please do not allow them to be displaced by an LPFM broadcaster in our area. Thank you!
